**Since 2014, ICOE** has been conducting numerous courses in Malaysia as well as the regional countries. It is an intensive and simulation based obstetric emergencies course.

We are happy to announce that ICOE will now be on site with emphasis on hands on practice. The module has been improved to allow longer time for hands on practice with newer equipment.

The lectures will now be online and made available to you before you come for the course. You are encouraged to listen to the online lectures before the course.

The two day course will have seven breakout stations covering a wide range of obstetric emergencies. You will be guided by experienced ICOE trainers who will demonstrate the skills that you need, which includes non technical skills.

So please register early to meet face to face, to learn skills and to exchange experiences.
